Ayer's Catnartic Pills,

For all the purposes of a Laxative Medicine.

Perhaps no one medicine is so universally required by everybody as a cathartic, nor was ever any before so universally adopted into use, in every country and among all classes, as this mild but efficient purgative *Pill*. The obvious reason is, that it is a more reliable and far more effectual remedy than any other. Those who have tried it, know that it cured them; those who have not, know that it cures their neighbors and friends, and all know that what it does once it does always—that it never fails through any fault or neglect of its composition. We have thousands upon thousands of certificates of their remarkable cures of the following complaints, but such cures are known in every neighborhood, and we need not publish them. Adapted to all ages and conditions in all climates; containing neither calomel or any deleterious drug, they may be taken with safety by anybody. Their sugar coating preserves them ever fresh and makes them pleasant to take, while being purely vegetable no harm can arise from their use in any quantity.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Minute directions are given in the wrapper on the box, for the following complaints, which these *Pills* rapidly cure:—

For **Dyspepsia** or **Indigestion, Listlessness, Languor** and **Loss of Appetite**, they should be taken moderately to stimulate the stomach and restore its healthy tone and action.

For **Liver Complaint** and its various symptoms, **Bilious Headache, Sick Headache, Jaundice** or **Green Sickness, Bilious Colic** and **Bilious Fevers**, they should be judiciously taken for each case, to correct the diseased action or remove the obstructions which cause it.

For **Dysentery** or **Diarrhœa**, but one mild dose is generally required.

For **Rheumatism, Gout, Gravel, Palpitation of the Heart, Pain in the Side, Back** and **Loins**, they should be continuously taken, as required, to change the diseased action of the system. With such change those complaints disappear.

For **Dropsy** and **Dropsical Swellings** they should be taken in large and frequent doses to produce the effect of a drastic purge.

For **Suppression** a large dose should be taken as it produces the desired effect by sympathy.

As a *Dinner Pill*, take one or two *Pills* to promote digestion and relieve the stomach.

An occasional dose stimulates the stomach and bowels into healthy action, restores the appetite, and invigorates the system. Hence it is often advantageous where no serious derangement exists. One who feels tolerably well, often finds that a dose of these *Pills* makes him feel decidedly better, from their cleansing and renovating effect on the digestive apparatus.

DR. J. C. AYER & CO., Practical Chemists, LOWELL, MASS., U. S. A.

Ayer's Cherry Pectoral,

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption.

Probably never before in the whole history of medicine, has anything won so widely and so deeply upon the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a long series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. While adapted to milder forms of disease and to young children, it is at the same time the most effectual remedy that can be given for incipient consumption, and the dangerous affections of the throat and lungs. As a provision against sudden attacks of *Croup*, it should be kept on hand in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.

Although settled *Consumption* is thought incurable, still great numbers of cases where the disease seemed settled, have been completely cured, and the patient restored to sound health by the *Cherry Pectoral*. So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them yield to it. When nothing else could reach them, under the *Cherry Pectoral* they subside and disappear.

Singers and Public Speakers find great protection from it.

Asthma is always relieved and often wholly cured by it.

Bronchitis is generally cured by taking the *Cherry Pectoral* in small and frequent doses.

So generally are its virtues known that we need not publish the certificates of them here, or do more than assure the public that its qualities are fully maintained.

Ayer's Ague Cure,

For Fever and Ague, Intermittent Fever, Chill Fever, Remittent Fever, Dumb Ague, Periodical or Bilious Fever, &c., and indeed all the affections which arise from malarious, marsh, or miasmatic poisons.

As its name implies, it does *Cure*, and does not fail. Containing neither Arsenic, Quinine, Bismuth, Zinc, nor any other mineral or poisonous substance whatever, it in nowise injures any patient. The number and importance of its cures in the ague districts, are literally beyond account, and we believe without a parallel in the history of Ague medicine. Our pride is gratified by the acknowledgments we receive of the radical cures effected in obstinate cases, and where other remedies had wholly failed.

Unacclimated persons, either resident in, or travelling through miasmatic localities, will be protected by taking the *AGUE CURE* daily.

For *Liver Complaints*, arising from torpidity of the Liver, it is an excellent remedy, stimulating the Liver into healthy activity.

For Bilious Disorders and Liver Complaints, it is an excellent remedy, producing many truly remarkable cures, where other medicines had failed.

Prepared by DR. J. C. AYER & Co., Practical and Analytical Chemists, Lowell, Mass., and sold all round the world.

THE PERFECTION OF PREPARED COCOA.

MARAVILLA COCOA.

SOLE PROPRIETORS,

TAYLOR BROTHERS, LONDON.

THE COCOA (OR CACAO) OF MARAVILLA is the true THEOBROMA LINNÆUS. Cocoa is indigenous to South America, of which Maravilla is a favored portion. TAYLOR BROTHERS having secured the exclusive supply of this unrivalled Cocoa, have, by the skilful application of their soluble principle and elaborate machinery, produced what is so undeniably the perfection of prepared Cocoa, that it has not only secured the preference of homœopaths and cocoa-drinkers generally, but many who had hitherto not found any preparat on to suit them, have, after one trial, adopted the Maravilla Cocoa as their constant beverage for breakfast, luncheon, &c.

"AN UNPRECEDENTED SUCCESS."

See following Extract from the Globe of May 14, 1868.

"Various importers and manufacturers have attempted to attain a reputation for their prepared Cocoas, but we doubt whether any thorough success had been achieved until Messrs Taylor Brothers discovered the extraordinary qualities of "Maravilla" Cocoa.

Adapting their perfect system of preparation to this the finest of all species of the Theobroma, they have produced an article which supersedes every other Cocoa in the market. Entire solubility, a delicate aroma and a rare concentration of the purest elements of nutrition, distinguish the Maravilla Cocoa above all others. For Homœopaths and invalids we could not recommend a more agreeable or valuable beverage."

Sold in packets only by all Grocers, of whom also may be had Taylor Brothers' Original HOMŒPATHIC COCOA and SOLUBLE CHOCOLATE.

CURES AND COMFORT FOR THE BED-RIDDEN.

—BY—

Holloway's Ointment.

This wonderful Ointment acts like magic in relieving curing old sores, wounds, bad legs, ulcers and eruptions of the skin; when rubbed on the surface it penetrates and purifies each tissue on its passage, and exerts the most wholesome influence over the internal structures. It heals by cleansing all animal fluids with which it comes in contact, and thereby promotes a sound and permanent cure.

Gout and Rheumatism.

To sufferers from the racking pains of Rheumatism and Gout this Ointment will prove invaluable. After fomentation with warm water the soothing action of this Ointment is most remarkable; it seems at once to lessen inflammation, ease pain, reduce the swelling, restore natural circulation, and expels the disease. For the above complaints Holloway's Ointment and Pills are infallible spe

Diptheria, Bronchitis, Sore Throats, Coughs and Colds

This class of diseases may be cured by well rubbing the Ointment, three times a day, upon the throat chest and back of the patient. It will soon penetrate and give immediate relief. In all stages of Influenza, Colds and Bronchitis, this treatment may be followed with efficiency and safety—indeed, it has never been known to fail.

All Varieties of Skin Diseases, Scrofula and Scurvy.

This Ointment is a certain cure for Ringworm, Scurvy Scrofula or King's Evil, and the most inveterate skin diseases to which the human race is subject. They cannot be treated with a safer or more speedy remedy than Holloway Ointment, assisted by his celebrated Pills, which act so powerfully on the constitution and so purify the blood that these disorders are completely eradicated from the system, and a lasting cure obtained

Dropsical Swellings.

Beware of this dangerous and stealthy complaint which frequently creeps upon us by slight squeamishness or trifling jaundice, of which little or no notice is taken until the legs begin to swell. The cause of the evil must be looked for in the liver and stomach, therefore set to work earnestly by taking Holloway's famous Pills according to the printed instructions and rubbing the Ointment very effectively over the pit of the stomach and right side where those organs lie. Most dropsical cases will readily yield to the combined influence of the Ointment and Pills.

Piles, Fistulas, and Internal Inflammation.

These complaints are most distressing to both body and mind, false delicacy concealing them from the knowledge of the most intimate friends. Persons suffer for years from Piles and similar complaints when they might use Holloway's Ointment with instant relief, and effect their own cure without the annoyance of explaining their ailment to anyone

Disorders of the Kidneys, Stone and Gravel

Are immediately relieved and ultimately cured if the Ointment be well rubbed twice a day, into the small of the back, over the regions of the kidneys to which it will gradually penetrate and in almost every case give immediate relief; but perseverance will be necessary to effect a thorough cure.

Both the Ointment and Pills should be used in the following cases:—

Bad Legs,	Cancers,	Scalds,
Bad Breasts,	Contracted and	Sore Nipples,
Burns,	Stiff Joints,	Sore Throats,
Bunions	Elephantiasis,	Skin Disease
Bite of Moschetos	Fistulas,	Scurvy,

FOR INFLAMMATORY AND CHRONIC RHEUMATISM AND GOUT, DYSPEPSIA or INDIGESTION, BILIOUS REMITTENT and INTERMITTENT FEVERS, DISEASES of the BLOOD, LIVER, KIDNEYS and BLADDER, these BITTERS have been most successful. Such Diseases are caused by VITIATED BLOOD which is generally produced by derangement of the digestive organs.

Cleanse the vitiated Blood, whenever you find its impurities bursting through the skin in Pimples, Eruptions or Sores; cleanse it when you find it obstructed and and sluggish in the veins; cleanse it when it is foul, and your feelings will tell you when. Keep the blood healthy and all will be well.

Confederation in the Hands of Its Enemies.

'Three more guns! She must be *very* drunk,' writes Horace Walpole, who is interrupted at intervals by a wild she-neighbor's firing an old rusty blunderbuss out at her window, by way of scaring imaginary conspirators. People do not get drunk now; but when imaginary conspirators are about some people fire off wonderful guns. We have waded through the two columns of 'facts and figures' presented to this public through the medium of the journal by a certain local medical authority; and that is more, we venture to think, than can be truthfully affirmed by ten per cent. of our readers. 'There is nothing,' said Canning, 'so fallacious as figures except facts.' We were never so profoundly impressed with the force of the paradox as now. The looseness in dealing with figures and the bold misuse of facts displayed in the letters alluded to comprise the features for which the labored and flatulent production is chiefly remarkable. We will not commit the indiscretion of asking the reader to follow us through the labyrinthian maze of distorted facts and manipulated figures; but we will conduct by a shorter road to a more satisfactory conclusion. The original or charter provinces forming the Dominion of Canada are Ontario, Quebec, Nova Scotia and New Brunswick. in what is called the 'Quebec Scheme,' the basis of union of these four provinces was agreed upon, and was subsequently embodied in the Act of Union. But it was never intended that the union of these four provinces should be the alpha and omega of Confederation. It was from the first designed to embrace the whole of British North America There were other provinces and territories which, while they were not parties to the 'Quebec Scheme,' were designed ultimately to come into the union. It was necessary, therefore, that provision should be made in the Organic Act for the admission of these, and as it was clear that conditions fair and acceptable to any one of the four charter Provinces might neither be fair nor acceptable to those outlying ones, the contingency was fully provided for by Section 146. a section which, although frequently quoted, we venture to reproduce here, with the hope that it may be read to better purpose than appears to have been the case with some:

'It shall be lawful for the Queen, by and with the advice of Her Majesty's Most Honorable Privy Council, on Addresses from the Houses of the Parliament of Canada, and from the Houses of the respective Legislatures of the Colonies or Provinces of Newfoundland, Prince Edward Island and British Columbia, to admit those Colonies or Provinces, or any of them into the Union, and on Address from the Houses of the Parliament of Canada to admit Rupert's Land and the Northwestern Territory or either of them, into the Union, on such Terms and Conditions in each case as are in the Addresses expressed, and as the Queen thinks fit to approve, subject to the Provisions of this Act; and the Provisions of any Order in Council in that Behalf shall have effect as if they had been enacted by the Parliament of the United Kingdom of Great Britain and Ireland.'

The above section provides for the admission of this colony; and it will be observed that, in entering the Dominion, British Columbia has no more to do with the conditions agreed upon between the charter provinces than with the 'man in the moon.' There are certain constitutional principles which must, as a matter of necessity, apply to whatever territory may come into the Union; but in so far as the assumption of our debt, and the amounts to be granted in the various forms of subsidy and allowance are concerned, these are matters of mutual agreement, to which the people of this colony are now invited and urged to become a party, while yet the opportunity offers; and we cannot help thinking that the time and labor bestowed in building up two columns of 'facts and figures' upon false premises, would have been more usefully and patriotically employed in impressing the colonists with the importance of timely and united effort in securing the most favorable terms that can possibly be obtained. We frankly admit that the terms which were accepted by the charter provinces would be unfavorable, in fact wholly inapplicable to British Columbia. But no intelligent Confederationist ever dreamed of asking or accepting them. Everybody was, in fact, presumed to know that this colony had nothing to do with these terms; and the painfully labored effort of our esteemed correspondent to prove that they would not be beneficial to this colony is, therefore, utterly and lamentably in vain,—just so much time and 'midnight oil' wasted. The effort of the Doctor reminds us of Cuvier's comment on somebody's definition of a crab as a fish that walks backwards, that, 'with the exception that a crab is not a fish, and that it does not walk backwards, the description is admirable.' One more remark, and we have done with a subject which, after all, had probably better have been disposed of in half a dozen lines. The customs tariff of the Dominion forms one of those constitutional and essentially Federal measures which *must* in its application be co-estensive with the Dominion itself. It may, therefore, be as well to expose an attempt to create misapprehension, and consequent prejudice. The colonists are told that 'each person in British Columbia pays $12, per annum to the customs, but in the provinces only $3 50,' and they are invited to believe that this glaring inequality will be perpetuated under Confederatton, whereas it is one of the strongest arguments in favor of the Canadian tariff that it will at once obliterate such inequalities, by relieving us of a heavy load of present taxation. We might go on *ad infinitum*, and expose the extraordinary use that has been made of facts and figures; in order to mislead unreflecting persons, but what has already been said must suffice. How much more patriotic and wise, we merely remark in conclusion, for all parties to unite in securing, under the provisions of the above quoted section of the Union Act, such terms as will be most conducive to the general wellbeing.

European Summary.

Our European papers are to the 16 h of October. At Rome preparations for the approaching Council are actively being carried on, and already numerous ecclesiastics have arrived. Valuable presents in money and goods have been sent to the Pope from various parts of the world to enable him to offer hospitality to the assembled prelates. The deaths of Earl St. Maur (only son of the Duke of Summerset,) Lord Cranstoun, Lord Dynevor, and Mr. R. W. Grey, one of the Commissioners of Customs, have been announced. Mr. J. P. Heywood, a banker of Manchester, and active supperter of the Liberal party in Lancashire, has declined Mr. Gladstone's offer of a peerage. Mr. Young, the Solicitor-General for Scotland, has been appointed Lord Advocate, in succession to Mr. Moncrieff, who has accepted the office of Lord Justice Clerk. The Parliamentary vacancy caused by Mr. Moncrieff's promotion to the Bench promises to give occasion for a contest, Mr. J. S. Mill being put forward by a portion of the constituency. The appointment of Dr. Temple as Bishop of Exeter has provoked remonstances from many of the clergy of that diocese. A married man of the name of Hinson, a carpenter, who had deserted his wife, and has been living for five years with a woman of an education very superior to his, Maria Death, suspected that a neighbor of the name of Boyd, a man of profigate habits, also married and also living with a woman who was not his wife, was attempting to seduce Maria Death. On the 14th Oct. he went from home, giving out that he should not return till Wednesday, but returned in the course of the morning, and found Maria Death absent in London and Boyd also absent there He waited for their return; they came together, and seemed to have spent the morning together at various publics houses. Hinson knocked Boyd down at the railway-station, half persuaded half dragged Maria Death home, shot her through the heart with a loaded gun which he always kept tn his house just as she was entering the door, and then knocked her about the head with the stock of the gun. He then went to Boyd's house, broke in the door with the stock, knocked him down at the stable, and knocked out his brains,—afterwards making a feeble attempt to destroy himself which did not succeed He has been, of course, committed to Newgate on a charge of wilful murder. A very big jewel has been found in Australia, which was half believed to be a diamond—a thing nearly as large as a turkey's egg, weighing some 900 carats, 3,600 grains,— or five times the weight of the Koh-i-Noor. The last telegram to Melbourne from the diamond diggings announced that it was, however, believed to be only crystallized quartz; but it had been deposited in the Mint at Sydney for safety, and its authenticity as a jewel had not been disproved. A murder of an old man of 75 by an older man of 81 is not a common event. Such a murder, however, to take place at Whitton, near Hounslow, England, and was followed by the suicide of the murderer, who blew his own heart out. The quarrel was a common and trivial one; the murderer being a tenant of his victim's and having in his cups maligned his landlord, from whom he had received notice to quit. On the previous Friday the landlord, Mr. Kyezor, and the tenant, Mr. Green, had had a public quarrel. All Saturday and Sunday the latter brooded over it, got some horse-pistols in readiness, met his victim on Monday morning in his early walk and shot him in the abdomen, returning home immediately to destroy himself. Mr. Kyezor, who was much respected, died within a few hours of his wound. Green's wife, who was evidently very much afraid of him, said he had had a slight sunstroke two years ago, and a fall on his head two months ago, which the coroner's jury made the excuse for finding that he committed the suicide in a state of tempoary insanity. London Bridge is choked with the traffic on it, and the City Council has been considering and rejecting all manner of expensive proposals for widening it. Foot passengers especially suffer. They are often in danger, and as Mr. M'George pointed out, the balustrades being solid, the bridge is a dust-trap in good weather, and a ditch in bad. The *Spectator* asks, will the *Builder* tell us if there is any final reason why a bridge like London Bridge should not have a second story put on it—a wooden bridge like a railway crossing, supported on iron pillars let into the buttresses, and reserved for pedestrians? No work in water would be necessary for that, and cabs would gain the space now occupied by the trottoirs. *Must* such a second story be too ugly for human endurance? The London *Spectator* says that Lord Granville has written a remarkable despatch to the Governor of New Zealand, wherein he peremptorily declines to allow the retention of the 18th Regiment; and confesses that his object in weakening the colony is to compel it to make peace with the Maoris, acknowledge their independence, and restore the confiscated land. As Lord Granville is bold enough to assert that the policy which he wishes to see reversed is one *'which the Home Government have always regarded as pregnant with danger,'* we quote the following passage in a despatch from the Duke of Newcastle to Sir George Grey, dated November 26, 1863, in which after reciting the plan of the Government of New Zealand for the confiscation of some rebels' land in the Waikato, and its distribution to settlers on a sort of military tenure, he goes on:—*'I do not disapprove of the principle of the measure.* I think that any body of natives which takes up arms against Her Majesty on such quarrels as are alleged by the Waikator, may properly be punished by a confiscation of a large part of their common property. I think that the lands thus acquired may properly be employed in meeting the expenses of carrying on the war, nor do I see any objection to using them as sites for military settlements.' In another despatch the Duke especially warned the Government against making peace too soon, till the natives are fully convinced they are worsted. The Home Government have regarded the policy which they now wish to reverse, as 'pregnant with danger,' not precisely *always*, but only since it became expedient to pick a quarrel with the colony.

Salt Spring Declares for Mr. DeCosmos and Confederation.

EDITOR BRITISH COLONIST.—At a public meeting held at the School House on Salt Spring Island for the purpose of hearing Mr. DeCosmos express his views on the political topics of the day, the following resolutions were adopted by acclamation.

Whereas—The Confederation of all the North American Colonies seems to be the settled policy of Great Britain. And

Whereas,—We, the inhabitants of Salt Spring Island, believe that Confederation will be of great advantage to this country both present and prospective. And,

Whereas—It seems evident from dispatches recently published that the question of uniting this country to the Canadian Dominion will soon be laid before the Legislative Council. And,

Whereas.—It is expedient that some expression of opinion on the subject should be made by those about to take part in the election about to be held in District No. 2. And,

Whereas.—Mr. DeCosmos, from his long political career in this country, ought to be, and in our opinion is, well qualified to watch over the interests of this country during the negotiations likely to take place, pending the admission of this country into the Canadian Dominion,

Therefore.—Be it resolved, that we, the inhabitants of Salt Spring Island, are unanimously in favor of Union with Canada.

Also.—Be it further resolved that we do hereby pledge ourselves to make every effort to secure the return of Mr. DeCosmos to the Legislative Council.

J. P. BOOTH, Sec.

Political.

To the Electors of District No. 2.

GENTLEMEN:—At the urgent request of a numerous and influential body of Electors I have been induced to ask your suffrages for the seat rendered vacant by the death of your late greatly esteemed representative.

In the present critical position of affairs, I consider it absolutely necessary for the future welfare of our Colony that we should not rush into Confederation with Canada, which it is the evident desire of the Home Government to force upon us, and which a small section of the politicians here are anxious to carry out at once.

I do not consider that the interests of the Agricultural community are likely to be improved by Confederation, unless a system of immigration to this Colony is made a condition. The longer Confederation is postponed the greater hope there is for us to obtain all the advantages which may be derived therefrom; and you will then have the opportunity of carefully considering your position before you finally commit yourselves to the irrevocable step; nor would I, under any circumstances, have Confederation without an Overland Railway, and regular Mail communication by ocean steamers.

Should you elect me all my energies shall be devoted to protect your interests.

There are several other topics which I shall be glad to touch upon, but I reserve them until I have the opportunity of meeting you personally. The question of Roads is, however, one I cannot overlook, as I consider that your welfare hinges on this subject, for without good and available means of communication it will be impossible for you to compete with our neighbors.

JAMES LOWE.

The Langford Lake Mystery.

The following evidence was adduced on Monday, and the prisoner Patrick, Fowler, committed to await the action of the Grand Jury:

Arthur Peatt, sen., testified that Fowler told him that during the time Butch was away he heard the crack of a rifle. Heard Fowler's statement at the inquest, which differed from his statement to me.

A. H. Peatt swore that he heard Fowler say Butch went away with Baker, and that after they had been gone an hour he heard the report of a gun.

Henry Kibblewaite testified that about the first of October Fowler told him he never lost sight of Butch the day on which Baker passed along the road. Never saw Fowler with a gun or pistol.

Legh Harnett swore that Fowler told him that Baker went on alone and that Butch in a short time walked away in the direction Baker had gone and was away a considerable time. Fowler added that Butch had no gun and that he (Fowler) heard no shot fired. Fowler was under the influence of liquor when he made the statement. He is a kind, hospitable man.

R. J. McDonnell deposed that prisoner told him he was thankful Butch was with him cutting a tree when Baker passed along.

Wm Mellington—Was told by Fowler that Butch went to the Plains (Langford's) with him and that he was not out of his sight at all. Have known Fowler as a good man.

Aaron White—Bought Fowler's house and farm three weeks after the inquest; he said he wanted to go to his wife and family on the other side, I have a good opinion of Fowler.

Mr. Theakston, Mr. Thos. A William on and officer McMillan, were examined as to the inquest and the finding of the jury.

MECHANICS' LITERARY INSTITUTE.—A very pleasant entertainment was arranged by the committee last evening. The attendance, considering the desperate state of the weather, was large and much satisfaction was manifested by the audience. Mr. Palmer presided at the piano and performed several operatic selections with correctness and taste, after which Mr. Brodie, R. N., was introduced by Mr Franklin, President of the Institute, and favored the audience with a reading from Ingoldsby's Legends — 'The Execution'—a serio-comic piece, which was vigorously applauded. Mrs Geo Beckingham sang in a sweet soprano the Crusader's Hymn, 'Partant pour la Syrie,' and was encored. The same lady subsequently gave a cavatina from 'La Favorita;' and in response to an enthusiastic and prolonged encore repeated the cavatina. Mr. Brodie then read a humorous selection which was so highly relished by the audience that they called the gentleman before the curtain and applauded him to the echo. Mr Brodie's manner is self-possessed and vivacious; just the style that would do justice to a humorous selection from Dickens. Two quartettes were sang by Mrs. Attwood and Messrs. Wilson, Jenkinson and Fox. Mrs. Attwood's voice is a soprano of exquisite sweetness, blending with the male voices, created a pleasing sensation. The quartettes were encored. Mr. Redfern sang a solo with excellent judgment, and was loudly encored. The entertainment, after a vote of thanks had been carried by acclamation, concluded with the National Anthem.

LONDON HOUSE—ARRIVAL OF THE AUTUMN AND WINTER STOCK.—By the Active J. H. Turner & Co. received their full stock of Autumn and Winter Goods. The stock left London *in September*—the best guarantee buyers at London House can have of the fashionable character of the goods. Particular attention is directed to the assortment of Dress and Millinery Goods, which is large and rich, and to the facilities at London House for Dress and Mantlemaking by experienced hands. *

WESLEYAN TEA MEETING.—The Annual Tea Meeting of the Wesleyan Church will be held in St. Nicholas Hall to-morrow evening. Several speakers will address the meeting, and a choir composed of volunteers from the various churches in the city will be in attendance. Tea will be served at 7 o'clock; and to judge by previous "teas" arranged by the same Church Society, a very pleasant reunion may be anticipated.

CITY COUNCIL.—This body met last evening, His Worship the Mayor in the Chair, and Councillors McKay, Gerow, Russell, Allsop, Carey and Walker, present. The rules of order were gone through, amended and adopted, and the revision of the Pound Ordinance deferred until 2 o'clock to-day, when the accounts will also be audited. The Council were still in session at 10 o'clock last night.

LOCAL BREVITIES.—A large oak tree has been blown across the road leading to Beacon Hill Park.....A hay wagon, while being drawn along Yates street, yesterday, was upset by the sou'easter.....No Chinese or Indian vote will be recorded at the district election, yet any other class of three months resident in the district may vote....The Police Court was a dreary blank yesterday.

HUDSON BAY CO. VS. L. DODGSON.—This case occupied the County Court all day yesterday. A mass of evidence having been adduced, Mr Bishop, for the defendant, addressed the Court, followed by Mr Drake, for the plaintiffs. Judgment reserved till Thursday.

ABOUT thirty Chinamen, having in their possession from $500 to $5000 in gold, sailed on the Active for the Flowery Kingdom.

REVENUE AND EXPENDITURE.—In the Government *Gazette* is published an abstract statement of revenue and expenditure for the United Colony during last year. The estimated revenue was $576,000, the estimated expenditure $572,553. The actual revenue was $584,008, the actual expenditure $485,729. The principal item, of course, is the Customs revenue which, however with the Port and Harbor dues, only makes $381,475, being $31,475 in excess of the estimates and $111,473 in excess of the previous year. Perhaps the least agreeable feature of these returns is to be found in the three items of miners' certificates, mining receipts, general, and licences, which fell below the estimates $4,470, $5,244 and $14,622 respectively, making a total deficit in these three items alone of nearly twenty-five thousand dollars. This fact unmistakably indicates a diminution in the mining population and of the interests dependent thereon. In view of these circumstances we are not surprised to find a falling of in the Postage receipts amounting to $2,247 and a considerable deficiency in Court receipts. The principal items of overdraft are: Governor $127,97, Colonial Secretary $660 12, Commissioner Lands and Works $164 55, Postoffice $1,295 80, Attorney General $499 82, High Sheriff $500. The principal underdrafts are: Crown officers and others, salaries, $5,254 46. Customs, salaries, $975 80. Police, salaries, $1,137 62. Gold Commissioners, salaries, $5 399 37. The practical financial result to the colony is that $86,823 82 less was expended during the year 1868 than the amounts provided by Acts for the service of the year. Looking at the matter in a general light, the returns just published cannot be said to be of an unsatisfactory character, and we are bound to admit that they indicate a carefulness and economy in handling the public revenue of the colony, creditable to those having the control,

THE reported barratry by the crew of the schooner Petaluma, in running away with the vessel from Esquimalt, is claimed to be incorrect. The captain was in town when word was brought up that the crew had weighed anchor, set all sail and were running out to sea. The captain procured a boat and started out to intercept the schooner, which he succeeded in doing. The sailors declared that they were bringing the vessel round to Victoria harbor; but as they had received no orders to move her, their course is suspicious, to say the least. The schooner, a little 20-tonner, altogether too small for sea-going purposes, is now at anchor near the Beaver.

IN San Francisco the keepers of the thieving saloons drug drunken men with a teaspoonful of snuff, dexterously dropped into a glass of beer. The nicotine renders the victim unconscious, and after stripping him the villians lay him down naked, as a moral lesson to passers by, in front of a rival establishment. The proprietors of a saloon called by the suggestive name of 'The Thunderbolt' are in custody on suspicion of causing the death by this means of an Italian who had wandered into their den in search of lightning.

THE completion of the Pacific Railroad 'smashed' the markets formerly supplied by the Oregon woollen mills with their fabric. The dear labor of the coast cannot compete with the products of the cheaper labor of the East and the increased facilities for transportation. So the mills are all about to close until *Chinese labor* can be substituted for white. Of course, a Chinaman, having fewer wants and no family to support, can underbid in the larbor market a white man

The Election.

EDITOR BRITISH COLONIST:—On Monday night I was present at a meeting convened by Mr. DeCosmos at the Oaklands. About 25 persons were present, and after sundry 'treats' Mr DeCosmos addressed the meeting. I must confess my astonishment at the arguments used by Mr DeCosmos as well as my surprise at the manner in which he seasoned them. Notwithstanding the resolutions offered by him at the Yale Convention on the subject of free port, he told his audience that he was *and had always been* opposed to free port, and that he would get for the farmers, if elected, an alteration in the Canadian tariff to suit them. He then commenced criticising his opponents, and not only them, but also 'the despot of Cary Castle.' He said that he would get into the Council 'in spite of Helmoken and the devil,' and wound up by anathematizing all who might vote against him.

A DISTRICT VOTER.

MORE WINE, OR MORE WITTLES!—An English clergyman went to a hotel to order a dinner for a number of clerical friends. 'May I ask, Sir,' demanded the waiter, gravely, 'whether the party is High Church or Low Church?'

'Now what on earth,' cried the clergymen, do my friends' opinion matter to you?'

'A great deal, Sir,' rejoined the waiter; 'if High Church, I must provide more wine; if Low Church, more wittles.'

FELL'S COFFEE has become the favorite Colonial beverage, and is to be found on every b eakfast table from Victoria to the foot of the Rocky Mountains. *

A District Voter on the Impending Election.

EDITOR BRITISH COLONIST:—I have read Mr DeCosmos' 'Card' and the lie he therein so directly and plausibly gives to the statement that he is in favor of Confederation 'without terms.' Probably in one sense it is true: Mr DeCosmos may require terms; but in the main and only important sense to the districts which he purposes to represent, I say that were we to accept him as a representative we should accept a man pledged by word and by deed on many a solemn occasion to such a Confederation as affords *no terms to the farmers.*

I am one who admires Mr DeCosmos as a public man for many effective qualities. He is a man who understands justly enough the principles and practice of mod rn political science; intelligent and industrious, yet he is without exception as likely to go wrong from vanity and self-interest as any public man I ever saw, and in my judgment utterly unsuited to represent the personal and local interests of the farmers and settlers of this Island.

Knowing Mr. DeCosmos for the man that he is, I have little hesitation in saying that in this question of Confederation he is one who views in such a movement mainly his own interests and his own distinction, and in contemplation of a career pregnant to himself with emolument and honor, will not stick at a trifle, and in his keeping the interests of the dis tricts he represents will fare but poorly.

Were I a person of power and influence, instructed to obtain Confederation by management and address, there is no class of man whom I should look upon as more certainly to be played upon with effect than our ambitious friend, Amor DeCosmos.

As a politician he, it would seem, is pledged to support Confederation with the terms of representative institutions at least, it not responsible government; but if these conditions should meet with little favor do you suppose for a moment he would insist on the terms if induced to waive them by the offer of place and political distinction here or elsewhere?

Let us test for a moment his written pledges. I refer to his six political letters, published early in 1868, which I believe completed the series on the subject of Confederation. Read them for yourself. In not one of them is the farming interest ever mentioned except in the concluding sentence to letter 5, published in the COLONIST of 11th Feb, 1868, in which he says, 'In a future letter I hope to take up the subject of protection to our farmers and manufacturers.'

This pledge, in his 6th and last letter, as I believe, he has most pointedly omitted to redeem.

Let us now refer to the terms of Confederation as suggested by the resolutions of the Yale Convention, in September, 1868.

In these I observed sentence after sentence in favor of representative institutions and responsible government and references to official mismanagement, reckless extravagance and the like, and a saving clause with regard to Victoria being a free port at a future period, but not a word about farmers; on the contrary, Term 12 is as follows:

'At the time of admission the revenue laws of the Dominion of Canada to extend and apply to British Columbia, and thereupon the revenue laws of British Columbia thereby affected to be null and void, &c, &c.' I am further assured that he stated at Yale, in reply to a question put to him, that nothing could be done for the farmers, as they must come under the revenue laws of the Dominion.' As these revenue laws are, as we know, unfavorable to home-grown produce, I see here a complete abandonment of the farming interest.

Does any living man doubt that although Mr DeCosmos, in his card published on the 5th inst. has stated that he was only in favor of Confederation on such terms as would 'protect the industries of the colony and place a large surplus revenue at the service of the local government,' he is still in heart indifferent to the interests of the farmers, and now in an underhand way solicits their suffrages under the shallow and ready-made pretence of insisting as a term upon protective duties in their favor. Mr. DeCosmos, in the summer of 1868, was the member for Victoria, and advocated Confederation in terms directly favorable to the interests of his then constituents, and hostile to those of farmers.

Now he assumes to be in favor of the farmers. How long will he remain so? Probably just so long as it is necessary to procure him a seat in the Legislature.

I esteem candour and consistency of conduct and principle above all other virtues in a representative of the people. Let the man *come out*. Let him come forward with his address and pledge himself to distinct terms in favor of the farming interest. I abhor cards and vague professions?'

What are his views in favor of reciprocity. This is no doubt a measure which would advance or it may be protect some industries in the colony within the terms of his card. The free admission of cattle and raw produce would seriously affect the farming interests. I never yet voted blind for a man who was ashamed or afraid to pledge himself to a written address, and I have a Saxon hatred for 'A wolf in sheep's clothing.

Yours, A DISTRICT VOTER

"CLEANSING THE BLOOD," upon which charlatans have harped so much, is not a mere catch-word and delusion. The microscope shows that some diseases exist like parasitic growths upon the globules of the blood, and it is further known that some subtile substances destroy or expel them. These substances have been combined to make Ayer's Sarsaparilla, which does effectually expel the disorders that breed and rankle in the blood to rot out as it were the machinery of life. MERIT REWARDED.—It must be a source of gratification and pride to the inventor, after years of study and toil, to have success crown his efforts, and know his labors are appreciated. This is peculiarly the case with Dr. Walker's Vegetable Vinegar Bitters, which is composed of purely vegetable preparations, making the most effectual alterative that it is possible for the medical intelligence and skill of our times to produce 27

HOLLOWAY'S PILLS.—The changes of temperature and weather frequently upset persons who are most cautious of their health, and most particular in their diet. These corrective, purifying, and gentle aperient Pills are the best remedy for all defective actions of the digestive organs; they augment the appetite, strengthen the stomach, correct biliousness, and carry off all that is noxious, from the system. Holloway's Pills are composed of rare balsams, unmixed with baser matter, and on that account are peculiarly well adapted for the young, delicate, and aged. As this peerless medicine has gained in fame the past, so will it preserve it in the future by its renovating and invigorating qualities, and its incapability of doing harm. 11

SHAREHOLDERS.

The Shares in the Permanent Stock will be paid up in full when taken.

The Shares in the Accumulating Stock may be paid up in one year, or in two or four years, by monthly instalments (made in advance), of $1, $2, or $1, as the case may be. To ensure punctuality in payment, small fines will be levied on defaulters.

On the expiration of one month after a share has been paid up in full, the holder will be entitled to receive the amount thereof with a share in the profits.

Members will, in certain cases, be allowed to withdraw the amount paid on their shares, with interest, before maturity of the Share.

A new series of shares will be issued each month.

The Profits of the Society will be derived from the Investment of the Funds of the Society.

BORROWERS.

The Loans with Interest will be required to be repaid by instalments, and the repayments may be made at such fixed periods as may suit the convenience of Borrowers.

DEPOSITS

Will be secured by the whole of the Property and Capital of the Society and by the Ordinance under which the Society is incorporated. The Society is precluded from taking as deposits any greater sum than ¾ of the amount of Capital actually paid in on unadvanced shares in the Capital of the Society and invested on Securities or Property.

Medical.

Ayer's Sarsaparilla,

FOR PURIFYING THE BLOOD.

The reputation this excellent medicine enjoys, is derived from its cures, many of which are truly marvellous. Inveterate cases of Scrofulous disease, where the system seemed saturated with corruption, have been purified and cured by it. Scrofulous affections and disorders, which were aggravated by the scrofulous contamination until they were painfully afflicting, have been radically cured in such great numbers in almost every section of the country, that the public scarcely need to be informed of its virtues or uses.

Scrofulous poison is one of the most destructive enemies of our race. Often, this unseen and unfelt tenant of the organism undermines the constitution, and invites the attack of enfeebling or fatal diseases, without exciting a suspicion of its presence. Again, it seems to breed infection throughout the body, and then, on some favorable occasion, rapidly develop into one or other of its hideous forms, either on the surface or among the vitals. In the latter, tubercles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it shows its presence by eruptions on the skin, or foul ulcerations on some part of the body. Hence the occasional use of a bottle of this *Sarsaparilla* is advisable, even when no active symptoms of disease appear. Persons afflicted with the following complaints generally find immediate relief, and, at length, cure, by the use of this *SARSAPARILLA: St. Anthony's Fire, Rose or Erysipelas, Tetter, Salt Rheum, Scald Head, Ringworm, Sore Eyes, Sore Ears*, and other eruptions or visible forms of *Scrofulous* disease. Also in the more concealed forms, as *Dyspepsia, Dropsy, Heart Disease, Fits, Epilepsy, Neuralgia*, and the various *Ulcerous* affections of the muscular and nervous systems.

Syphilis or *Venereal* and *Mercurial Diseases* are cured by it, though a long time is required for subduing these obstinate maladies by any medicine. But long continued use of this medicine will cure the complaint. *Leucorrhœa* or *Whites, Uterine Ulcerations*, and *Female Diseases*, are commonly soon relieved and ultimately cured by its purifying and invigorating effect. Minute Directions for each case are found in our Almanac, supplied gratis. *Rheumatism* and *Gout*, when caused by accumulations of extraneous matters in the blood, yield quickly to it, as also *Liver Complaints, Torpidity, Congestion* or *Inflammation* of the *Liver*, and *Jaundice*, when arising, as they often do, from the rankling poisons in the blood. This *SARSAPARILLA* is a great restorer for the strength and vigor of the system. Those who are *Languid* and *Listless, Despondent, Sleepless*, and troubled with *Nervous Apprehensions* or *Fears*, or any of the affections symptomatic of *Weakness*, will find immediate relief and convincing evidence of its restorative power upon trial.

Ayer's Hair Vigor,

For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. *Faded or gray hair is soon restored to its original color with the gloss and freshness of youth.* Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

HAIR DRESSING,

nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich glossy lustre and a grateful perfume.

REPORT.

NEW WESTMINSTER, Oct 18th, 1869.

To the Directors of the Howe Sound Copper Mining Company, Limited.

GENTLEMEN:—We beg to report for your information the result of the work done by us on your reserve, at White Cliff Point, Howe Sound, and our ideas as to the prospects for the future derived from our observations of the ground, etc.

The tunnel which had been commenced before we went to work, followed a seam running North and South, pinching East into the hill at a dip of about one foot in three for the first thirty-seven feet, increasing to one foot in two afterwards. We continued to follow the seam for twenty-four feet further, making in all a distance of sixty-one feet of a tunnel, six feet high and four feet wide.

We did not find any copper ore in the seam, which was composed of spar and quartz, slightly impregnated with copper and mundic; but from the commencement of the tunnel to where we left off, five seams of about two inches in width each, running into the hill, joined the seam we were working on, horizontally. One of these we traced a distance of eight feet to the right by driving in that direction. All these seams contain quantities of copper ore of good quality, which would, in our opinion, assay from twenty-five to thirty per cent. During the last ten or twelve feet of blasting in the tunnel we found considerable and increasing quantities of mundic, which is a highly favorable indication. From the appearance of the seam upon which we were working and from the indications mentioned, we were led to believe that the main lode lay further back in the hill, and we consequently instituted a series of explorations, the result of which was the discovery of a quartz seam about fifty feet back, which, running in a similar direction, pitches down at a dip of nearly four feet in six feet. The average width is about seven to eight inches and it has all the appearance of being a main lode. We traced it along the surface for a distance of one hundred and fifty feet. Our opinion is that the seam upon which we have been tunneling, and all the smaller ones met during the work run from this seam now discovered, and that by driving or sinking on it you would discover a good Copper lode of rich ore. We would, in conclusion, recommend you, instead of continuing to sink on the present seam, to run a level from it into the seam or lode now discovered which we think would be reached in about thirty feet from the end of the present tunnel.

We are, Gentlemen, Your Obd't Serv'ts,
WM. MAY,
THOMAS TERRY.

Rheumatism, Dysentery, and Fever.

THE "TIMES," OF INDIA, STATES "that the discovery of Dr. J. COLLIS BROWNE'S CHLORODYNE is a greater blessing to the human race than even the discovery of Vaccination." This remedy is invaluable in the above diseases, and is indispensible to Emigrants, Travellers, and Families, a few doses being generally sufficient.

DR. J. COLLIS BROWNE'S CHLORODYNE.—The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport, that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See "Lancet," December 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Extract from "Medical Times," January 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not 'supply a want and fill a place.'"

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in Coughs, Colds, Asthma, Consumption, Neuralgia, Rheumatism, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE—Extract from the General Board of Health, London, as to its efficacy in cholera. "So strongly are we convinced of the immense value of this remedy that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay: "Chlorodyne is a most valuable remedy in Neuralgia, Asthma and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other medicines had failed."

It is necessary to warn the public against spurious imitations, which only bear the pirated name, and are deficient of the true properties of the only genuine, viz.: DR. J. COLLIS BROWNE'S, as was proved before Vice-Chancellor Sir W. P. Wood, in the Court of Chancery, in case Browne vs. Freeman, when the Vice-Chancellor stated that the story of Freeman being the Inventor was DELIBERATELY UNTRUE.
